接口文档

一,登录接口--用于用户登录

1.url:

http://127.0.0.1:5000/apis/login/

2.请求方式

(1) post请求

需要传递的参数如下

```
{
    'username': 'test1',
    'password': '123456',
    'type': '0'
}
```

返回的数据如下

```
{
   "msg": "\u767b\u5f55\u6210\u529f",
   "data": {
        "username": "test1",
        "id": 4,
        "type": 0
    },
   "status": "success"
}
```

二,老师和督导队创建课程,督导队端获取所有课程

1.url:

http://127.0.0.1:5000/apis/link/

2.请求方式

(1) post请求

需要传递的参数如下

```
"id": "<app.globalData.rid>",
 'usertype':0 // 用户类型
 "building": "<that.data.w1>",
 "classroom": "<that.data.w2>",
 "time1": "<that.data.t1>",
"time2": "<that.data.t1>",
 "jsonData": {
 "课程名称": "<parsed_course_name>",
 "任课教师": "<parsed_teacher_name>",
  "学生名单":[
   "学号": "<student_id_1>",
   "姓名": "<student_name_1>"
  {
   "学号": "<student_id_2>",
  "姓名": "<student_name_2>"
  // ... more students ...
 ]
}
}
```

返回的数据如下

```
{
    'msg':msg,
    'course_id':ct_id
}
```

(2) get请求

需要传递的参数如下 (无需传递参数)

```
http://127.0.0.1:5000/apis/link/
```

返回的数据如下

```
{
    "Course_informations": [
    {
        "course_id": 4,
        "course": "软件工程A",
        "building": "东三",
```

```
"classroom": "305",
      "week": "周五",
      "time_period": "一二节"
      "course_id": 5,
     "course": "软件工程A",
      "building": "东三",
      "classroom": "305",
      "week": "周三",
      "time_period": "七八节"
   },
      "course_id": 8,
      "course": "软件工程A",
      "building": "东三",
      "classroom": "305",
      "week": "周五",
      "time_period": "三四节"
 ]
}
```

对应的原型场景如下

三, 渲染老师首页接口--老师首页显示的课程(根据时间显示)

1.url

2.请求方式

(1) get请求

需要传递的参数如下

```
http://127.0.0.1:5000/apis/tHome/?user_id=1&week=周五
```

返回的数据如下

```
{
    "Course_informations": [
    {
        "course_id": 4,
        "course": "软件工程A",
        "building": "东三",
        "classroom": "305",
        "week": "周五",
        "time_period": "一二节"
    }
}
```

四,渲染老师我的接口--老师我的显示的课程,所有课程

1.url:

http://127.0.0.1:5000/apis/tMine/

2.请求方式

(1) get请求

需要传递的参数如下

```
http://127.0.0.1:5000/apis/tMine/?user_id=4
```

返回的数据如下

```
{
    "Course_informations": [
        {
             "course_id": 5,
             "course": "软件工程A",
             "building": "东三",
             "classroom": "305",
             "week": "周三",
             "time_period": "七八节"
        }
    ]
}
```

五, 缺勤名单 (老师端) ---老师端的基于课程的缺勤名单

1.url:

http://127.0.0.1:5000/apis/cAbsencesForT/

2.请求方式

(1) get请求

需要传递的参数如下

```
http://127.0.0.1:5000/apis/cAbsencesForT/?course_id=5
```

返回的数据如下

```
"Student_absences": [
      "student_number": "20191",
      "student_name": "张三",
      "absence_count": 2,
     "details": [
       "2021-01-24",
       "2023-11-19"
     ]
   },
      "student_number": "20194",
      "student_name": "枭",
      "absence_count": 1,
      "details": [
       "2020-12-12"
      ]
   }
 ]
}
```

对应原型中的场景 (备注: 缺勤的具体时间在详情中查看)

六,课程的花名册(点名与保存缺勤信息--老师和督导队都适用)

1.url:

http://127.0.0.1:5000/apis/cRoster/

2.请求方式

(1) get请求

需要传递的参数如下

```
http://127.0.0.1:5000/apis/cRoster/?course_id=5
```

返回的数据如下

```
{
    "stu_informations": [
    {
        "stu_no": "20191",
        "stu_name": "张三"
    },
    {
        "stu_no": "20193",
        "stu_name": "一心"
    },
    {
        "stu_no": "20194",
        "stu_name": "枭"
    }
}
```

(2) post请求

需要传递的参数如下

```
{
    "course_id": 4,
    "stu_list": [
        {"学号": "20191"},
        {"学号": "20192"},
        # 添加更多学生
],
```

```
"leave_list": [
{"学号": "20193"},
{"学号": "20194"},
#添加更多学生
],
"date": "2023-01-01",
"place": "东三305",
"time": "周五三四节",
"usertype": 0 # 假设用户类型为教师
}
```

返回的数据如下 (有多种情况, 反正就下面这样)

不重要,就返回一些msg

七, 请假的相关处理 (辅导员端)

1.url:

http://127.0.0.1:5000/apis/leave/

2.请求方式

(1) get请求

需要传递的参数如下

http://127.0.0.1:5000/apis/leave/?userid=5

返回的数据如下

```
{
    "Leave_messages": [
    {
        "student_number": "20193",
        "student_name": "一心",
        "leave_date": "2023-11-28",
        "message_id": 1
    },
    {
        "student_number": "20194",
        "student_name": "枭",
        "leave_date": "2023-11-29",
        "message_id": 2
    }
}
```

(2) post请求

需要传递的参数如下

```
{
    'message_id':1,
    'flag':0 // 标志, 0为不属实, 1为属实
}
```

返回的数据如下

{'status':'success'}

八, 自然班的获取与创建 (辅导员端)

1.url:

```
http://127.0.0.1:5000/apis/grade/
```

2.请求方式

(1) get请求

需要传递的参数如下

```
http://127.0.0.1:5000/apis/grade/?user_id=5
```

返回的数据如下

```
{
    "gradeData": [
    {
        "id": 1,
        "name": "计算机1班",
        "admission_year": '2021'
    },
    {
        "id": 2,
        "name": "计算机2班",
        "admission_year": '2021'
    }
}
```

(2) post请求

需要传递的参数如下

```
{
    "user_id": 5,
    "jsonData": [
    {"班级": "2021计算机类01班", "学号": "102101101", "姓名": "布吉岛"},
    {"班级": "another_class", "学号": "another_student_number", "姓名": "another_student_name"}
]
}
```

返回的数据如下

无关紧要

对应原型中的场景

辅导员创建自然班--根据此表格进行解析

21计信学生信息表 20231023.xlsx

25.8K

へ へ 八 中

九, 今日缺勤推送 (辅导员端)

1.url:

http://127.0.0.1:5000/apis/absencePush/

2.请求方式

(1) get请求

需要传递的参数如下

http://127.0.0.1:5000/apis/absencePush/?user_id=5&today_date='2023-11-28'

返回的数据如下

```
"status": "success",
 "today_absence": [
  "student_name": "一心",
  "student_no": "20193",
   "date": "2023-11-28",
   "teacher": "吴老师",
   "course": "软件工程A",
   "place": "东三305",
  "detail_time": "周五三四节"
 },
   "student_name": "枭",
   "student_no": "20194",
   "date": "2023-11-28",
   "teacher": "彭于晏",
   "course": "软件工程A",
   "place": "东三305",
   "detail_time": "周五三四节"
 }
 ]
}
```

今日缺勤推送	
102101101 彭于晏	详情
102101102 刘亦菲	详情
100101102 中成化	2.大作車
102101103 宋威龙	详情
